London based full stack engineer with a love for all things computers. UEA Computing Science graduate. I also enjoy performing DJ mixes at local venues, longboarding and cooking vegetarian food.

Employment

Jagex Software Engineer — From Apr 2025 until present
Java • Kafka • Terraform • EKS • Snowflake

- Migrated multiple services from on-prem servers to AWS.
- Implemented changes to the registration flow, preventing automated account creation.
- Worked with designers to implement UI changes and redesigns.

Hyperliminal Software Engineer — From Aug 2024 until Apr 2025
TypeScript • React • WebGL • Cloudflare • Postgres

- Developed and shipped the pre-alpha release of the company's flagship product.
- Built a custom engine for the game client on top of WebGL.
- Implemented netcode allowing state synchronisation between multiple clients.

Self Employed Computer Science Tutor — From Jun 2023 until Aug 2024
Python • C • Haskell • Assembly • MySQL

- Helped GCSE and A-Level students reach A* proficiency in computer science.
- Assisted multiple first and second-year university students in achieving first-class grades.
- Provided daily tutoring to students with diverse skill levels and backgrounds in coding.

Magicave Game Developer — From Feb 2022 until Jun 2023
Unity • Kubernetes • Docker • GCP • MongoDB

- Wrote no-code tools enabling designers to build levels and modify game statistics.
- Developed and deployed backend infrastructure for the game using Kubernetes.
- Co-wrote the character creation system for the company's flagship game.

Phlashweb Software Engineer — From Aug 2021 until Feb 2022
C# • .NET • ASP.NET • Azure • SQL Server

- Resolved multiple security vulnerabilities in the client's customer-facing website.
- Restructured and migrated the client's SQL database, improving backend performance.
- Maintained and improved internal tools for the client's warehouse workers.

Fruitlab Game Developer (Internship) — From Feb 2021 until Aug 2021
JavaScript • Node.js • React Native • AWS • RDS

- Built a web-based game using WebGL for playback on web and mobile devices.
- Wrote and deployed leaderboard services hosted through AWS.
- Collaborated with designers to ensure the game always met requirements.

Education

University of East Anglia Computing Science — Graduated with bachelors
Java • C++ • Git • Unix • SQLite

- Served as vice president of the Computer Science Society, organised social events.
- Handled promotional material for the Electronic Music Society, improved event turnout rates.
- Wrote dissertation on cellular automata, computational theory and Conway's Game of Life.
